BERLIN, Germany, Feb. 7 .- The German Reichstag has passed the Brussels sugar convention and also resolved to reduce the internal revenue luty on sugar to ten marks a metric hundred, beginning with April,

The reduction of the internal revenue duty has been sought for a long time in Germany. The proposed reduction is from 14 marks to 10. This will have a marked effect on the consumption of sugar and is generally looked upon as especially good news for the sugar-producers.
